Basic Player Manual

1. Playing the Game

Yabec is a Table Top Role Playing Game, where you take on the role of an adventurer in a fantasy world. You and a group of other traveliers explore a dangerous hole in the ground, in search of treasure.

One person takes on the role of Dungeon Master. They are a referee and guide. They'll describe a sichuation. Then you'll get to ask questions and gain more information. The Dungeon Master will narrate the consequences of your actions, or ask you to make dice rolls.

This is a classic dragon game, that's simlar to many of the fantasy role playing games which have achieved pop culture success. But, due to a lot of reasons, we dont associate with the megacorp product anymore.

Except for the first time doing service, chaotic aligned characters can hire a goon to do service for them. The first time it costs 100 cp. Each time after costs 12 more, compounding. Diety disfavor can not be forgiven this way.

2. Basic Downtime

These downtime activities can be done by any character.

1. Limit

Each character can be a boss to a finite number of minions, determined by Charisma (see page 4).

Minions must be lower level and have fewer hit dice than their boss

2. Duties

Most minions are not mindless slaves. If abused minions might desert, mutiny, betray, or slander their boss.

3. Item slots

A minion has 5 item slots, and can not use a backpack. Horses, and some monsters, have different amounts of item slots.

- They have a -2 to reaction rolls with non-monsters.

- When in sunlight, they have a +1 to AC, and AV.

The Rule Book

This section is a point by point breakdown of every aspect of the game system. It is not the player's requirement to read the player's reference. New players should use the [Basic Players Manual](#) to create a character, and then learn by playing.

All players are welcome and encouraged to read the rule book in order to gain a better understanding of the game, but only at their leisure and interest.

The Dungeon Master should know the rules well enough to run and teach them.

1. Modification

The book is meant to act as a standard reference for how the Dungeon Master makes rulings. While the Dungeon Master's call is ultimently final, its recommended to stick to the book, and later change unsatisfactory rules. Yabec is open source, and available on Github.

If players don't like the rules, they should begin a conversation about how they would like the rule, and the kind of game they are interested in playing. When an agreement is made, it should be reflected in the book. If they have other games they are interested in playing, they should also bring those to the conversation. /gen

The book also acts as a suggest stock of rulings. If the Dungeon Master should be able to appeal to the book, and get a simple but opinionated rule. The new rule should not disrupt

the flow of play, but rather maintain it. If the rule turns unfun, it should be ammended via the above process.

2. Index

PLACEHOLDER

3. The Conversation

You may be familitar with this concept from other ttrpgs. The game is essentially a back and forth between the players and the Dungeon Master.

1. The Dungeon Master begins by describing a sitchuation.

2. Players ask questions to gain information about the enviornment.

3. Eventually, the players choose to undertake some action. The Dungeon Master will describe the consequences of the action, sometimes taking specific die rolls into consideration.

4. This becomes the new sitchuation, and the loop begins again.

4. Hooks

Some actions are actions. The italics indicate that this is a hook, a keyword with in the rules, with specific consequences.

Yabec is designed around chains of hooks. For example, in conflict, the game is played in rounds, which during each you get one action, which you use to attack, and then when all combatants have acted, a new round begins, and so on...

5. Schemes

You can think of a scheme as a sub-game, or as a model to guide the conversation.

1. Town

Players navigate an urban setting, often splitting up to do downtime, or go shopping. The scheme ends when the players depart on an adventure.

2. Delve

Players explore a dangerous dungeon. This scheme ends when the players leave the dungeon. Then clean up.

3. Conflict

Players fight or flee from monsters. This scheme occers within a delve, or rarely, in a town.

4. Challenge

Players race to get enought successes. This scheme is blended in with others.

5. Clean Up

Handle experience, splitting treasure, and other loose ends. Either end the session here, or begin town again.

6. Systems

1. bad

A generalized status condition.

2. distance

Each room is a zones to avoid counting exact squares.

3. experience

Some actions score XP.

4. inventory

Players can hold about ten items.

5. life

Once players take more damage than health, things get bad.

6. light

The distance and effects of light.

7. mapping

Details exact map calls for players who want them.

8. noise

The distance and effect of noise.

9. roles

Pre-made roles for players to make the game smoother.

10. rolls

Different types of die rolls.

7. Metagaming

I have a lax approach to metagaming. Any info gained during the session is valid, including;

- Info from dead characters.
- Deduced AC and Hit Dice.

Dungeon

Exploring a dangerous dungeon.

1. Basics

1. Turns

Actions will take a turn to complete. Each turn, the Dungeon Master will check for hazards (see below).

2. Free Actions

Free "actions" do not impact the turns and can be done freely, to an extent.

- Moving and looking around the current zone are free actions.
- Checking doors.

As a rule of thumb, gathering information is free, changing the environment ia an action. See The Conversation.

3. Marching Order

While moving in narrow hallways, movement is restricted. The marching order is decided by the players. In general, only the front and the back are significant.

2. Actions

This is a non-exaustive list of the actions players might take in a dungeon.

1. Move

Move to an adjacent zone.

2. Run

Move at reckless pace. Move through 6 zones. During this, players are surprised by all encounters, spring all traps, create loud noise, cannot map, and cannot check doors.

3. Parlay

Converse with the dungeon denizens.

Reaction roll

The Dungeon Master might ask for a reaction modifier. see character p4.

The Dungeon Master might make the roll at advantage or disadvantage, depending on the player's actions. A high roll will make the monsters more friendly. A low roll will make them more hostile. A very high or very low roll will also make them bad for one round. See Dungeon Master p15.

4. Conflict

One conflict will take one turn.

5. Search

Searching reveals non-obvious features, such as traps. A search will always reveal everything it can.

Searching will also reclaim one half of ammo.

Splitting Up

Seaching a zone takes three people one turn, or one person two turn.

6. Rest

Removes fatigue. Ignore the fatigue hazard while resting.

7. Bandage

Bandages can be used to gain some healing. Make an intelligence check. If you succeed, heal the target 1d6, plus a bonus from your wisdom. See ability scores. You may bandage yourself.

Bandaging consumes a bandage. Once you are bandaged, you can not be bandaged again until you are damaged.

3. Hazards

At the end of each turn, the Dungeon master will check for hazards.

Differnet enviornments will have different odds, but generally, there's 1-in-6 chance of each hazard. Some areas may have more or less wandering monsters, some areas may have additional hazards. etc.

The Dungeon Master should knock on the table to indicate the turn.

1. Burn

Torches burn out, and lanterns need fresh oil.

2. Fatigue

Become fatigued. Anyone already fatigued takes 1 damage.

3. Shift

Traps reset, doors swing close, and other aspects of the dungeon are triggered.

4. Wandering Monsters

In dangerous or unstable areas, monsters may begin hunting you.

4. Doors

Doors not held open will swing silently shut during a shift.

Magical doors need special conditions to be opened, and canâ€™t be picked, or broken.

1. Checking Doors

Once per turn, a player can check a door.

Each door can only be checked once.

The Dungeon Master rolls a d6. – **Peephole:** If there is a peep hole, or cracks, +2. – **Class:** If a player has a bonus from their class, add only the strongest bonus. – **Results:** A roll of 5 or more will reveal information. Revealing â€œnothingâ€ or â€œdarknessâ€ is indicative of either a failure, or accurately assessing a dark quiet room

2. Failing to open

Attempting to open a stuck, bared, or locked door fails loudly.

3. Breaking Doors

Physically destroying a door is an action, requires appropriate tools, and makes loud noise.

5. Varient Rule: Flashback

Each session, each player may have up to one flashback. The following are provided as suggestions.

In general, anything that could have been done in town can be done as a flashback.

1. Purchase

Have gotten a particular item while shopping.

2. Conversation

Role play a brief conversation had before the adventure.

3. Backstory

Role play the origin of a character.

4. Preperation

How were you prepared for an unexpected challenge?

6. Fleeing the Dungon

Once a party beings to flee the dungeon, they can not stop until theyâ€™re out.

Each round, move to an adjacent zone, then one character must take 1d4 damage.

Conflict

Short burst of turn based combat; also covers chases.

1. Inititative

The Dungeon Master can employ either of these two methods for initiative.

1. Dramatic

Each round, each combatant can take one action. Then they must wait for the next round to act again.

Players choose the order they and their minions go in. However, after each of their actions, an enemy will act.

2. Ranked

At the start of conflict, each player rolls a d10 and adds their dexterity score. This is their count. Ordinary monsters have count 13. Powerful monsters have count 21. Minions have a count equal to their boss.

At the start of each round, the creature with the highest count takes one action. Then proceed in decending order.

Ties between the players can be resolved in either order they please. Players win ties against monsters.

2. Actions

1. Attack

Make an attack with a weapon. See below.

2. Magic

Cast a spell or use a magic item. See Magic.

3. Move

Move to an adjacent zone.

4. Sprint

Move twice. Make a constitution check. If you fail, you are bad during the next round.

5. Focus

Until the end of the next round, you have advantage on dodges, saves, attacks, and checks.

6. Stunts

Other maneuvers are stunts. How they are resolved is up to the Dungeon Master.

Stunts may not cause damage directly.

Suggestions

Shove: a hit has a 3-in-6 chance of moving an enemy to an adjacent zone. **Intimidation:** with a successful charisma check, force enemies to make a moral check. **Disarm:** a hit grants a dexterity check to disarm an enemy. **Sunder:** a hit deals one damage to the weapon or armor.

7. Flee

If you have not been hit this round, you begin fleeing: Move, you are no longer in conflict.

3. Attacking

1. Statistics

The Armor Class (AC) is how likely a target is to be hit.

The Attack Value (AV), also called THAC0, is how likely an attack is to miss.

Lower AC and AV are better.

The Dungeon Master might either announce the result of the attack, or tell you the AC/AV so you can announce it yourself.

2. Making an Attack

To attack, subtract a d20 from you AV. If it is greater than or equal to the AC, you hit. Otherwise, you miss.

3. Dodging an Attack

To dodge an attack, roll a d20 and add your AC. If it is less than or equal to the AV, the attack is a miss. Otherwise, it is a hit

4. Miscellanious

1. Flanking

In melee, if one side surrounds the other, the surounded side has a +4 penalty to AC.

2. Friendly Fire

When a ranged attack misses, players make a dexterity check to void hitting an ally. Monsters and minons have a 3-in-6 chance.

3. En Passant

The first time each turn that a combatant takes a move action, they may also make an attack

4. Subdual

If a creature is slain with a blunt weapon, they can be left non-leathally incapacitated, and bad until a shift.

5. Mapping

During conflict, it's possible to reference a map, but adding to a map is impossible. The dungeon master will not make map calls. See page X

6. Movement

While not bad, each combatant can move freely within a zone. Changing zones takes an action.

7. Exaustion

At the end of the 9th round, and each round after, all creatures still involved in the combat take 1 damage.

Clean Up

1. Basics

1. Award Experience

See Experience.

2. Divide treasure

Players split up the treasure between them (and their minions if agreed).

Money is typically split evenly, while magic items have conflicting calls diced or bargined for.

3. Funerary Rites

See life and death.

4. Town

When clean up is finished, return to town or end the session.

2. Evaluate Loyalty

At the end of each session the hirelings evaluate their loyalty.
- If their boss chooses to pay their wages a second time, they gain one point. - If an animal or monster got to eat its favorite prey, they gain one point. - If a hireling died that session, non-monster hirelings with the same boss loose one point. - If a hireling or monster completed a goal, they gain one point. - They may gain or loose more points at the refereeà€™s discretion.

Town

Spend a brief period in civilization, making plans, securing allies, and gathering supplies.

1. Natural Healing

Characters recieve natural healing, and are restored completely.

Varient Rule: Gritty Healing

Characters of 2nd level or greater heal 1d6 per Lv per session.

2. Minions

If there is a chracter of 2nd level or greater, 1d4 human hirelings will seek employment. If the total level of the party is 15 or greater, 2d6 2nd level hirelings will seek emplyment.

3. Shopping

Every town will have the basic items availble. Some towns may have additional shops. Ask your Dungeon Master.

4. Downtime

The first time in town per session, returning characters get one downtime. See Extended.

Characters who owe service must preform it before puruing other options.

5. Travel

End the scheme and go to a dungeon. See below.

6. Goals

Set goals to potentially score more XP. See below.

1. Travel

The Dungeon Master will present an overworld map with one or more dugeons, an possibly other towns.

1. Deciding a destination

Any player can contribute to the discussion of what dungeon to go to. However, only one player needs to chart the journey.

Unopinionated players can simply follow the party to whichever dungeon they go to.

2. Charting

1. Count the number of hexes between the party's current location, and the destination.

2. If the destination is a dungeon, add the number of hexes back to a town.

3. If any, add the number of rivers and other obstivles.

4. For each player and minion, aquire a ration for each hex.

5. (optional) If crossing a body of water, also aquire the fare for passage on a boat.

Best practice is to have each participating player compensate the quarter master for their rations.

3. Departing

One player, ideally the Caller will announce "Adventuers to depart!".

Once all players have confirmed they are ready to depart, the players travel to their destination.

If it is a dungeon, change the scheme to dungeon.

If it is a different town, simply continue town in the new location.

2. Goals

Each session, the players may agree to set one goal for the party. If the goal has already been completed in the past, or is not difficult enough, the Dungeon Master may reject it.

Completing a goal is a score. See Experience.

1. Examples

- Kill a the bear with the scarred eye.

- No character deaths.

- Get to the third level of the dungeon.

- Rescue a particular prisoner.

- Recover a particular treasure.

Challenge

Challenges are another scheme the Dungeon Master can employ.

1. Objective

At the start of a challenge, the Dungeon Master will announce the number of successes needed to complete the challenge.

2. Checks

1. Players make action to confront the challenge, and how they will support each other.

2. Dungeon Master will say which Ability to use, and if it is risky.

3. The player makes the check, with advantage for each supporter.

3. Risky

Risky checks start with two disadvantages and failure will remove two successes.

Mapping

Dungeons are complex enviornments where it is easy to get lost. Keeping a map is essential.

This chapter covers simple and detailed methods of mapping. It is a simple system not able to cover every possible map, so you may have to get creative.

Additionally, you may wish to modify the system to better suit your needs. Any agreed upon system will work.

Its reccomended that one player take on the role of Mapper. See Roles.

1. Simple Method

Rather than track the exact dimensions of every room, the mapper might opt to keep a general shape of the dungeon.

The mapper draws a loose flow chart, labeling rooms and their connections.

2. Calls

To keep an exact map, the mapper should ask the Dungeon Master for a call.

Each call should have an unambiguous meaning. The mapper and Dungeon Master should work together to establish calls that work for them.

The Dungeon Master should avoid looking at the players map, and avoid perfecting the players map.

1. Restrictions

The Dungeon Master will only provide calls when the players ask, and only after they enter a room and are able to spend time observing it.

If the players loose their compass, calls will not include cardinal directions.

3. Corridor Calls

Except for hallway, each of these calls indicate exactly one square.

1. Hallway

Hallway, number, direction: Indicates the corridor goes straight for a number of squares in that direction. **Draw:** Two straight lines.

picture

Hallway 3 west.

2. Turn
....

turn, direction: Indicates a square where the corridor turns in the direction **Draw:** A dot + an L shape.

Left: turn east.

Right: Hallway 1 north. AND Turn west.

3. Split

Split, (directions): indicates the corridor slits left and right. **Draw:** Line + two dots.

4. Cross

5. Branch

6. Terminate

Terminate: Indicates the end of a corridor. **Draw:** Three sided U.

picture

Terminate.

7. Large Corridors

Large corridors can ban called in the same manor, but scaled to be twice as big, thrice as big, etc.

4. Room Calls

1. Rectangular

Designate a door as the entrance. Call how far the wall extends to each side. Then describe the depth of the room.

picture

Room: 1 north, 2 south, 3 deep.

2. Wall trace

From the entrance, going clockwise, call the direction and length of wall segment.

picture

Room, wall trace: north east 1, east 2, south 2, west 1, south 1, east 2, south 1, south west 1, west 2, north east 2, east 1, north 1

3. Large rooms

Large rooms, such as caverns, can be called by an extension of the wall trace method. A wall on each side can be traced, bit by bit.

4. Irregular Caverns

Irregular caverns can be called by describing the general path of the cavern and width of the cavern, similar to wall trace.

5. Doors / Exits

1. Definition

Doors are hinged panels. Exits are open passageways.

Call them after calling a rooms or corridors.

2. Calling

On each wall, count squares from east to west, north to south (reading direction), naming the number of the squares, and whether there is a door or an exit.

You can also call the center, or last square. **Draw:** Pictogram

picture

Doors: East wall 2nd & 4th squares. South wall center.

Exit, west wall 2nd square.

3. Stairs

Stairs, and a direction (up or down), indicate a square filled with stairs. The stairs extend away from the previous call.
Draw: Pictogram.

6. Solution

Ask your Dungeon Master.

Bad

Bad is a monolithic, generalized status conditions.

Attacks against bad targets always succeed.

Bad creatures can: – Hear. – Speak. – Save. – Take desperate actions: For example, move randomly in the dark, or move inches while bound.

Bad cretures can not: – Move. – Attack. – Cast spells. – Use magic items. – Use class skills. – Sunder their shield.

Depending on the exact condition, Bad creatures might be able to take some limited action. For example, a blind creature may beable to move randomly, or a bound character might work to break out of their restraints.

Noises

The are two kinds of noise:

1. Silent

Produces effectivly no sound; no effect.

2. Loud

Heard by distant listeners. Increases the chance of wandering monsters. Etc. Most sounds are loud by default.

A loud sound can be made silent with a dexterity check. If the player takes a moment to prepare, they can check with advantage.

Experience

This chapter covers experience points (XP) and how it is awarded. XP is a measure of a PC's power and wealth, and creates progression.

1. Score Card

At the start of the session, the Score Keeper will begin a score card: a simple piece of paper to write down scores as they happen.

At the end of the session, the Score Keeper will confer with the DM to confirm each score, and establish the total amount of XP.

XP is divided evenly between all surviving characters. The Score Keeper will announce the individual amount gained.

1. Minions

If a player is 2nd level or higher, their minions gain the same amount of XP.

2. Variant Rule: Prime Requisite

Each class has one or two prime requisites, which grants bonus XP for having a high ability score.

Characters with at least a 9 in one prime requisite gain 5% extra XP.

Characters with at least a 9 in both gain 15% extra XP.

Characters with at least a 16 in one prime requisite gain 15% extra XP.

2. Scores

A score is anything that awards XP.

1. Treasure.

Recovering treasure from a dungeon scores 1 XP per 1 cp value of the treasure.

Recovering a magic item scores 1000 XP.

Recovering a particular quest item scores 1000 XP.

2. Defeated Monster

Defeating monsters scores XP based on their HD, plus a bonus for each special ability. e.g. a 2 HD monster with an ability is worth 25 XP.

HD	Base	Bonus
<1	5	1
1	10	3
2	20	5
3	35	15
4	75	50
5, 6,	300	250
7, 8,	650	550
8%¥9	1000	700

3. Challenge

Completing a challange scores 100 XP times the number of successes.

4. Roles

Having players with roles during clean up scores 250 xp for each unique role. Duplicate roles score 30 xp.

5. Goal

Achieving a goal scores 100 XP per character involved.

Failing to achieve a goal scores -200 XP.

6. Affirmed Invokation

Each unique rule invoked scores 30 XP.

7. Mapping

Exactly mapping a complete dungeon level scores XP equal to 1000 times the depth of the level.

3. Extra Sources of XP

1. Taking a role in town

Taking on a role in town can score immediety XP.

2. Session Report

Writing a session report awarsds 100 XP to the writer.

3. Punch Card

On a player's tenth session, they get 1000 XP.

4. Specials

From time to time, the Dungeon Master might offer additional bonuses. For example, for writing lore about NPCs.

4. Leveling Up

When a character gains enough XP to reach the next experience level:

- Looks at your class progression tables and notes any improvements in saves, AV, spells, etc.

- Roll your HD and add it to your HP.

- Gain an additional downtime.

- Increase two different ability scores by 1, to a maximum of 18. At 9th and 14th level, you may instead increase one ability with an 18 to a 20.

1. One Session Maximum

Characters cannot advance more than one level in one session. Leave the character 1 XP below the threshold for the next level. The remaining XP can be distributed among the other characters, as the player wishes. If all characters are 1 XP below the threshold, extra XP is wasted.

5. Abandonment

A character of 2nd level or higher can be abandoned. They permanently leave the game. Abandonded characters can leave 50% of their wealth and 80% of their XP to a new adventurer.

Light

1. Levels

There are three kinds of light:

1. Dark

The darkness is pitch black, and prevents sight. Imposess blindness.

2. Dim

Allows some detail to be seen.

3. Bright

Allows full vision, including details and reading. Disables infravision.

2. Distance

A light source casts bright light within touch, and dim within distant.

3. Infravision

A special type of vision had by many monsters: seeing heat energy that radiats of living things.

When a creature with infravision stands in bright, they are blinded for one round, and their infravison is disabled until they spend a full turn in the dark.

It is not possible to read in the dim or dark with infravision.

4. Blindness

Creatures who are unable to perceive their surroundings are bad.

Distance

1. Zones

The dungeon enviornment is split into zones. As a rule of thumb, each room and hallway is a zone. Large rooms or hallways may be multipule zones.

1. Guidelines

- **Architecture:** Architectual features, such as doorways, should divide zones.

- **40':** Rooms bigger than 40', and hallways longer than 40', should be multipule zones.

- **Even:** Large rooms and hallways should have their zones divided evenly.

- **Whole Number:** Large rooms and hallways should always have a whole number of zones.

2. Ranges

Ranges and relative location are divided into four ranges.

1. Touch

Striking distance.

2. Close

Throwing distance. Speaking distance. With in the same zone.

3. Distant

Shouting distance. Farthest distance to make out details (in bright light).

In dark environments, the player's torch will often be the limit of theire sight. This means that anything within torch light is distant.

4. Sight

Anything that can be seen. Up to 3 miles in ideal conditions.

Player Roles

There are several optional roles that players can have. Using roles makes play smoother and easier for the Dungeon Master. Use a notecard or token to keep track of roles.

In addition to potentially being a score for the party, taking on a role during town scores awards 50 XP to that character. 100 XP for Callers and Mappers.

If a player with a role dies, another player may take on that role.

Its possible to have multipule of most roles. For example, there can be a Caller for delving and a Caller for combat, or two Mappers that check eachother's work.

1. Chair

Make sure roles are filled. Go through each role, ask for volunteers.

2. Score Keeper

Keep track of scores, such as looted treasure, and defeated monsters. See experience.

3. Quater Master

Chart the path to the dungeon while in town, and keep track of torches, bandages, and other equipment.

4. Mapper

Keep track of the layout of the dungeon. If you'd like, ask the Dungeon Master for exact map calls. See mapping.

5. Caller

Get consensus on what the party would like to do, and communicate to the Dungeon Master.

6. Scribe

Keep track of the different monsters and traps, their behaviors, mechanics, and even their combat statistics (depending on the Dungeon Master's approach to metagaming).

Item Slots

In order to carry an item, the character must have a free item slot to carry it. – **Heavy Items:** Two slots. – **Small Items:** Five per slot. – **Person or body:** Three slots. – **Other Items:** One slot.

1. Number

A character has a base of five slots, plus five from a backpack is ten, plus a bonus from their constitution.

Chests and carts can be used to carry even more. Minions also have item slots, typically five.

1. Encumberance

Becoming encumbered doubles a creature's slots. Encumbered creatures are bad, but can attack with disadvantage, and move at half speed.

2. Horses

A horse can carry a person and their items, OR twenty slots plus pulling a cart or wagon.

Rolls

This page details a lot of different kinds of rolls.

1. Abilities

There are six abilities: strength, dexterity, constitution, intelligence, wisdom, and charisma. They're rated from 3, the worst, to 18, the best.

1. Checking

You succeed if d20 <= the ability score. (low roll good)

2. Saves

All characters and monsters can make saves to avoid the full effects of certain traps, spells, and attacks.

Having a lower save value is better.

1. Catagories:

There are five saving throw catagories: - Death (D): When targeted by a death ray, or exposed to poison. - Weird (W): When exposed to radiation or other worlds. - Paralysis or Petrification (P): When targeted by an efect that paralyses or turns to stone. - Blast (B): When target by dragon breath or explosions. - Spells or magic (S) When targeted by a banefull spell or effect from a magic item.

Your class's progression table determines you save values.

2. Checking

You succeed if d20 >= save value. (high roll good)

Success against an effect that causes damage means that the damage is halved. Otherwise, the effect has been entierly avoided or negated.

3. Advantage and Disadvantage

1. Advantage

When making a roll with advantage, roll an additional time for each advantage. Take the best roll.

During a challenge, count every success on an ability check with advantage.

2. Disadvantage

When making a roll with disadvantage, roll twice and take the worse.

3. Combination.

One disadvantage and advantage cancel eachother out.

4. Variant Rule: Heroism

Push yourself. Take 2 damage or reduce you constitution score by one. Choose one:

- Gain advantage on one check.
- Take an action dispite bad with disadvantage.

Life & Death

This section covers health, damage, and dying.

Unlike many games which count HP down, Yabec counts damage up.

1. Health Points

Health points (HP) represent the ability to withstand injury and exaustion.

1. Health Die (HD)

Health dice are used to determine HP. Each class has a diferent HD. Monsters have a d8 HD.

At 1st level, a character's HP is equal to the highest value on their HD.

2. Healing

Healing removes damage.

1. Magical Healing

Magic potions or spells can provid instantaneous healing.

When magically healing a near death character, they dismember with advantage.

3. Damage

Damage represents injury, exaustion, and wear.

1. Slain

When a creature takes damage equal to or greater tan its HP, it is slain, Slain minions and ordinary monsters instantly die. Slain PCs and powerful monsters are near death. See Near Death.

Destruction

If slain by fire, or explosion, items are destroyed, and PCs and powerful monsters instantly die. Magic items have a chance of miraculously surviving.

2. Item Damage

Some items can become damaged. Items with four or more damage break completely. Magic items are immune to damage.

Each point of damage incurs a penalty:

- **Weapons:** -1 to damage rolls.

- **Armor:** +1 to AC.

- **Other:** -1 to any rolls made with it.

Dwarves are able to repair items as downtime.

4. Near Death

After a full turn near death, creatures die.

If a creature takes any damage while near death, they dismember.

Creatures near death are bad.

1. Healing

When healed while near death, a creature instead rolls for dismemberment. If healed by magic, they roll with advantage.

2. Dismemberment

Roll a d12, and add constitution score. Reference the table. If they survive, they heal 1.

Result	Dismeberment
<= 11	Dead!
12	Broken leg: +2 AC
13	Lost arm
14-15	Lost eye
16-17	Concussion: -1d4 wisdom and intelligence
18-20	Torn muscle: -1d4 dexterity
21-23	Bone fracture: -1d4 strength
24-26	Broken rib: -1d4 constitution
>=27	Unharmed

5. After Death

1. New Character

As soon as you have a new character sheet, the Dungeon Master will add your character at earliest contrivance.

2. Burial

Simple burial prevents the vody from being reanimated.

Temples will burry and bless the dead for free.

Creamation prevents reanimation and is impossible to undo.

Rites

If a cleric uses one turn to preform a blessing, the soul will pass peacefully.

When funerary rites are preformed, the character sheet must be ripped up. Players are encouraged to give eulogy, play music, and create intricate rituals.

3. Inheritance

When a character dies, their companions can loot their body.

Money and items stored in town will be subject to a 15% estate tax to local government or temple, and then inherited by the next of kin or listed heir.

4. Resurrection

Returning from death is an ordeal. Until the subject gets two weeks of bed rest, they have 1 HP, move at half the normal rate, can not carry heavy items, cannot attack, cast spells, or use class skills.

Each time a character is resurrected, their constitution is reduced by 1.

6. Low Ability Score

If a character has an ability score reduced to less than three, they die.
