CHARACTER CREATION

Get a sheet of paper, or print out a character sheet, to record all of your character's details. Make sure to do so in pencil, as these details change over time. If your character sheet ever gets too messy, you can always copy the info to a fresh paper!

1. PROFILE

Choose a name, class, and alignment for your character.

Note the creator's name (probably your name) and the date they were created.

1. STATS

Write your current level (1) and max level given by your class. Then write your current EXP (0) and the EXP required to reach the next level.

Roll 3d6, and multiply the result by 10. Write that you have that much money in copper pieces (cp).

Note that there are 10 cp in 1 silver piece (sp), and 10 sp in 1 gold piece (gp), so you may convert your cp into the other forms of currency if you want.

2. ABILITY SCORES

Your character has six ability scores:

1. Strength (**STR**)
2. Dexterity (**DEX**)
3. Constitution (**CON**)
4. Intelligence (**INT**)
5. Wisdom (**WIS**)
6. Charisma (**CHA**)

To determine them, roll 3d6 seven times, and choose six of the resulting values to assign to your ability scores.

If you would rather not roll the dice, assign them from one of the following lists of values:

- 13, 13, 11, 11, 8, 8
- 16, 13, 10, 8, 6, 5

Make sure you have the minimum stat requirement to use your class.

3. PRIME REQUISITES

- If you have at least 13 points in one of your prime requisites, note that you get a 10% EXP boost.
- If you have at least 18 points in one of your prime requisites OR 13 points in two of your prime requisites, note that you have a 15% EXP boost.

2. STATS

Yabec has several stats associated with combat and exploration. Like your ability scores, most of them will improve as your character levels up.

1. **Hit Points / Health Points (HP):** Check your class's hit die. Give yourself HP equal to the max roll of that die.
2. **Attack Value (AV):** Give yourself your class's AV for level 1.
3. **Armor Class (AC):** Give yourself 9AC, the base AC for an unarmored human.
4. **Saves:** Note your physical (PHYS) and magical (MAGI) saving throws based on your class and level.
5. **Class stats:** If your class has any extra stats (like a **Wizard's** spell slots or a **Hollow's** Endurance), note them here.

1. OPTIONAL: A NOTE ON HEALTH

Yabec formally uses a damage up system, meaning instead of losing health, you gain damage. If you would like to play as intended, create a place where you can take note of how much damage you have accumulated.

That being said, your character sheet is your own, and as the person who will be looking at it the most, you may make a judgement call on how you want to keep track of health.

3. SKILLS

1. CLASS SKILLS

Note the skills provided by your class.

2. WEAPONS AND ARMOR

Note the types of armor and weapons you can use.

3. LANGUAGES

Note the languages you can speak.

4. OPTIONAL: LOCKED SKILLS

Optionally, note the skills you haven't unlocked yet but are planning to/are guaranteed to unlock in the coming levels.

4. INVENTORY

Give yourself 10 inventory slots, and any starter items provided to you by your class.

5. HIRELINGS

Yabec allows players to have a certain number of hirelings. See Hirelings for more details.

For now, write your base Renown and Starting Loyalty (4 and 7 respectively). This will later be affected by your **CHA**, among other things.

6. ABILITY SCORE BONUSES

Factor in the bonuses or penalties to your stats from your ability scores.

It is recommended to write your boosts next to the base value of your stat to avoid applying them multiple times.

7. COMPLETE!

Congratulations! You've created your character! Introduce them to the rest of your party.

To finish getting ready for adventuring, head over to the shop to buy gear and hirelings, sort out any class-specific setup things, and think about your character's personality. Happy adventuring!

ALIGNMENT

The alignments are: Lawful, Neutral, or Chaotic. This impacts spellcasting and roleplay. Note that some classes have restrictions on which alignment they can be.

Beneath the surface of everyday life, two primeval forces mingle. Their servants see a cosmic harmony permeating the plane, or see only probabilities.

1. MAGIC

Magic affects creatures differently depending on alignment. Divine spellcasters need to be especially aware of their alignment; lawful casters may upset their deity by casting reversed spells, and vice versa. See LINKKKK for more details.

1. ALIGNMENT LANGUAGE

Creatures automatically recognize a certain set of gestures, signs, and

code words, pertaining to their alignment. This allows creatures of common alignment a measure of communication.

Creatures of a different alignment are likely to recognize an alignment language being spoken, but will not understand its content.

1. REVEALING ALIGNMENT

Players must reveal their alignment to the dungeon master, but are not required to reveal to each other.

1. ROLE PLAYING ALIGNMENT

If the character acts too far out of their alignment, the referee may require them to change their alignment and suffer a penalty.

1. CHANGING ALIGNMENT

When changing alignment from Lawful or Chaotic, characters lose 10% of their xp.

- **Uncanny Stealth:** A thief can attempt to hide motionless in shadows, or sneak past enemies unnoticed.
- **Pickpocket:** If the victim is above 5th level, the thief's roll is penalised by 5% for every level above 5th. There is always at least a 1% chance of failure. A roll of more than twice the percentage is required for the theft to be unnoticed.

60. HOLD MONSTER

A creature is paralyzed and incapacitated. Lasts 2 turns per level.

Restriction: the target must not be undead.

Reversed: Free Monster

A creature is instantly freed from mundane restraints, and may make an additional saving throw against magical restraints.

61. PASS-WALL

The caster touches solid stone. A 5' diameter hole is temporarily opened, forming a passage-way up to 10' deep.

After a shift, the passage seals, without a trace.

62. TELEKINESIS

The caster concentrates for up to six rounds. During that time, they are able to mentally move objects or creatures within a long distance.

- Weight: Up to 2 item slots, or 50 lb, per level of the caster may be moved at once.
- Movement: The target may be moved up to 2 squares per round, in whatever direction the caster wishes

63. TELEPORT

A touched creature disappears and reappears at a location of the caster's choosing, including its gear

The destination may be at any distance, but must be known to the caster. The destination must be an open space at ground level. (It is not possible to intentionally teleport the subject into mid-air or into solid matter.)

>

There is a risk of accidentally arriving above or below ground level. The chance of a successful teleportation depends on the caster's knowledge of the destination (see right). Roll d% and consult the table

Know.	of	Dest.	Ground	Level	Too	High	Too	Low
Scant	01-50	51-75	76-00					
Medium	01-80	81-90	91-00					
Exact	01-95	96-99	0					

- Ground level: The subject appears at the desired destination.
- Too high: The subject appears 1d10×10' above the intended destination. Should this location already be occupied by solid matter, the subject is instantly killed. Otherwise, the subject falls from a height.
- Too low: The subject appears in the ground and is killed instantly.

Knowledge of destination: The caster's knowledge of the destination is rated as follows:

- Scant: A location that the caster has visited once or twice, has seen by magical scrying, or has heard of from descriptions.
- Moderate: A location that the caster has visited often or has studied via scrying for several weeks.
- Exact: A location that the caster has made a detailed study of, in person

64. WALL OF STONE

A wall of solid rock appears. The wall may be of whatever shape the caster desires and is of 1,000 cubic feet in volume. (For example, a 2' thick wall, 50' long and 10' high.) The wall must rest upon a solid surface and may not be evoked so that it appears where objects are.

Reversed: Wall of Air

The wall functions the same as the wall of stone, but is made of an invisible air current. It lasts until fatigued twice.

6. 6TH LEVEL

65. ANTI-MAGIC SHELL

An anti-magic barrier is created around the caster. It's a 10' radius sphere. It moves with the caster. The caster must concentrate to maintain it. No spells or spell effects can pass through this barrier, whether from inside or outside. The effects of magic items and other spells are suppressed while in the sphere.

Lasts until fatigued twice.

66. CONTROL WEATHER

By fully concentrating the caster can control the weather in a quarter mile radius. When concentration is broken, weather returns to normal.

This spell only functions outdoors.

Reversed: Control Earth

Earth (but not stone) within within a quarter mile, that the caster can see, is rearranged as the caster wishes.

Movement rate: The caster can move earth in the area at up to 60' per turn.

Excavations: The range of the spell also extends downwards, allowing excavations to be made.

67. DISINTEGRATE

The material form of a single, non-magical, distant or closer, creature or object is instantly and permanently destroyed.

If a creature is targeted: It may make a physical save to resist disintegration.

Examples of objects: The following might be targeted: a tree, a ship, a 1 square section of wall.

68. INVISIBLE STALKER

An invisible stalker is summoned to the caster's presence and magically bound to perform a mission of the caster's choosing.

- **Wording:** The caster must be careful with the wording of the mission. Invisible stalkers will follow the letter of the command while twisting the intent.
- **Duration:** The creature is bound to attempt the mission until it succeeds or is destroyed.
- **Banishing:** The spell Dispel Evil will banish an invisible stalker, ending the spell.

69. PROJECTED IMAGE

An illusory duplicate of the caster appears within range. Lasts for six turns.

- **Duplicate:** The image is an exact duplicate of the caster that can only be differentiated by touch.
- **Subsequent spells cast:** Appear to originate from the image. (Targets must still be visible to the caster, however.)
- **Spells and missiles:** The image appears unaffected by spells or missile weapons.
- **Melee or touch:** If the image is touched or hit in melee, it disappears.
- **Range:** The image must remain distant or closer to the caster.

70. REINCARNATION

A dead character is returned to life in a new physical form that manifests in the presence of the caster. The character's new body is not necessarily the same as the original; it is determined by rolling on the Reincarnated Class table. The roll indicates either a character class or a monster:

The character is of experience level 1d6 lower than they were in life. There is a 2-in-6 chance they are the same class, a 1-in-6 chance they are a different human class, 2-in-6 they are a different demihuman class, and a 1-in-6 chance they are instead a monster of the same alignment and number of hit dice.

Reversed: Death Spell

Choose a zone within 240'. Up to 4d8 Hit Dice of creatures make a physical save or die, instantly. Undead and creatures with >7 HD are unaffected.

71. STONE TO FLESH

HIRELINGS

Hirelings are NPCs that help the party. These include trained animals, humans which can be recruited to carry items and even fight in combat, and henchmen who level and grow like players. You may even be able to persuade monsters, or summon special creatures.

- Use a note card or additional sheet of paper to keep track of hirelings. You can use one card for each, or a large sheet with several.
- Each character can have a maximum number of hirelings equal to their **Renown**.
- Hirelings must have fewer hit dice than their **boss**.
- Hirelings must have their upkeep paid at the start of each session and each 7 days. Monsters with 10 or more loyalty do not need to be paid upkeep.
- The boss must provide for any new adventuring gear, weapons, or mounts.

1. LOYALTY

Hirelings are not mindless slaves. If abused, hirelings might desert, mutiny, betray, or slander their boss.

The starting loyalty score of a hireling is your character's loyalty, and each monster starts with 4 loyalty.

Hirelings with two or less loyalty will betray boss, and have a 4-in-6 chance of reducing their renown by

one. Monstrous, and chaotic hirelings may only cooperate temporarily, betraying their boss once the conditions are right.

1. LOYALTY CHECK

Roll 2d6. The check succeeds if the result is equal to or less than the loyalty score.

2. PERIL

Dangerous tasks are **perilous**. A hireling must succeed a loyalty check or refuse the task. Furthermore, if they take damage or come to any unexpected harm during the task, they lose one loyalty.

Example of peril include:

- fighting a risky and unnesscary battle
- becoming lost in the dungeon
- acting as bait
- probing unknown objects

3. STATS

The dungeon master has stats for animals and monsters.

Hirelings have 19AV, 9AC, and 5HP with saves 8PHYS and 5MAGI.

1. HENCHMEN

Henchmen are sidekicks which can gain EXP and level up like players. There are two ways to gain them:

1. If a hireling survives three sessions, they can become a level 0 henchman.
2. A NPC can be persuaded to become a player's henchmen through roleplay. The dungeon master will decide what level they start at.

- Henchmen have 10 inventory slots.
- Henchmen have a d8 hit die, and calculate HP like players.
- Henchmen go near-death and dismember like players.
- When a boss gains EXP, each of their henchman also get that EXP.

- Instead of upkeep, henchmen are paid with a portion of their boss's treasure. That portion is equal to two divided by their loyalty.
- At 2nd level, they gain one ability. If their boss is a spellcaster, they can memorize one 1st level spell from their boss. Otherwise, they choose one **fighter skill**.
- At 4th level, they gain a second ability. If their boss is a spellcaster, they can memorize one 2nd level spell from their boss. Otherwise they choose one advanced fighter skill.

- You can only have one henchman.

DOWNTIME

Downtime is an optional system to roleplay the character's actions between adventures, and provides benefits to players.

3. ENHANCING EQUIPMENT

Lose any amount of XP up to the sum of all six ability scores. Add that much XP to an item. When that item has 333 XP, it becomes a +1 enhanced item. When it has 3,333, it becomes a +2 item. When it has 33,333 xp, it has a 3-in-6 chance to become +3, or to explode.

4. COMMUNITY SERVICE

Performing service at the temple has no direct benefit, but may be required as penalty for crimes.

Except for the first time, characters can hire a goon to do the service for them, first costing 100 cp, then costing 1% more, compounding.

Deity disfavor will not be forgiven if you hire a goon.

5. HEALING

A stay in the temple of your alignment costs 100cp, or one downtime worth of service. It cures mundane illnesses, has a 5-in-6 chance of curing mundane toxins, and has a 2-in-6 chance of removing curses.

6. GAMBLING

Play a number of games of Dragon Ante equal to up to thrice your level.

You might also hear rumors. Make two **CHA** checks. For each you succeed, ask the Dungeon Master for a rumor.

Dragon Ante

The buy in for each game is 50cp. Roll a 2d10 and see the result.

If you are a thief, add your level to the roll. If you roll two ones, you still go to jail, and the fine is doubled.

2. WILD WYVERN

Once you win (or lose) 101 cp or more in a single downtime, you are invited to a Wild Wyvern table: an exclusive game for the best players. It is the same as Dragon Ante, with the following modifications:

- Buy in, as well as the pay outs, and penalties are increased by a factor of 100.
- instead of 2d10, use 4d6-1d12.
- Whenever you roll two or more of a kind (except for five fives and four fours), you enter double dragon: wager an additional 500cp, reduce the number of games you'll play by the number of a kind. Then add that many d4s to your roll.
- When you roll five fives, you will 55555cp. When you roll four fours, you loose 4444cp.

Your mentor pays you a number of cp equal to:

After, make a **CHA** check. If you succeed, multiply your bonus by 1.2.

3. TRAINING

You can only train under a mentor of the same class and a higher level than you. traing costs 10 cp, times the level of your mentor.

Spend upto 100 times your Lv in cp. Gain that much experience. If you spend 20% more, your henchmen also gain half that much experience.

8. SELLING

Try to get a better buy on your treasure.

Each downtime, you can find buyers for treasure equal to 500 cp times your level. If a single object is more valuable than that, you must work for several downtimes to sell it; other players may assist by using their downtime as well.

When you sell the item, roll a d100 on the table, and add your charisma score.

d100	Sale
<20	Robbed! 0%
20-29	Low ball: 75%
30-39	Low ball: 90%

If you get a low ball, you can refuse to sell, and try again next downtime.

9. TAMING

Mundane animals can be tamed by anyone. Druids, and Elves, can tame magical animals, and tame mundane animals twice as fast.

12. RESEARCH

Use your downtime to learn! Not to be confused with **magical downtime**

Choose an object to study, such as a log book, artifact, or monster corpse. Make a number of strength checks equal to your level. You gain research points equal to the number of successes. Each time you research, you can spend points to learn from the subject.

- One point: a piece of background info.
- Two points: a specific or unique fact.
- Three points: ask a question and get a yes/no/maybe answer.
- Five points: ask a question and get an answer 20 words or less.

ADVANCED DOWNTIME

These downtime activities are only available to certain classes, and only to characters 2nd level and higher.

1. CRIME

Only Thieves, Acrobats, Animalkin, Kobold and Warlocks can pursue crime.

Thieves have advantage on ability checks made for crime.

1. HEIST

A heist is a single large crime or scheme. Get a note card to keep track of your progress on the heist.

2. TILLING A VACANCY

Scoping out a new heist takes one downtime.

1. Write the **location** and the **target** on your heist card.
2. Roll a number of d12 equal to your level. This is the **value** of the heist in sp.
3. Roll a d6. This is the **potential** of the heist.
4. Roll 2d4. This is the **heat** of the heist.
5. Write each ability score.

Up The Ante

If you're up for a challenge, the heat of the heist becomes 10, and the value increases tenfold.

3. RISK

Whenever you take a risk, cross off an ability score from your heist card. If none remain, take your pick instead. Check that ability. If you fail, there is an X-in-8 chance of trouble, where X is the the heat of the heist.

After the first trouble, the heist loses two potential and gains one heat. Additionally, you must pay a fine equal to twice the value of the heist, and perform a downtime of service.

After the second trouble, you end the heist, pay a fine of four times the value, and must perform two downtimes of service.

Losing a Glove

If you are unable to pay the fine, you instead have a hand cut off. If you have already lost both hands, you are executed instead.

4. ACTIONS

Each downtime, you can take one action on an existing heist.

Bite the Blow

If the heist has at least one potential, take a risk to get paid 20% of the value. Reduce the potential by one.

Fence

When a heist has zero potential, take a risk to end the heist, and get paid 100% the value.

Till a Rounder

Invite another character to the heist. Each downtime, including this one, they can use their downtime to take one action.

Pay the Prigs

Add an NPC accomplice's name to the heist card. Each accomplice takes a 10% cut, but gives a -2 bonus on the ability check for risk.

Tide the Vacancy

Increase the potential by one.

Tide the Heat

Spend a downtime carousing. Reduce the heat by one, to a minimum of three.

Grease the Hamlet

Pay 1 gp. Take a risk to automatically succeed the next three risks.

2. DEVOTION

Only divine magic-users can perform devotion. The first time they do, they must describe the ritual they use for their devotion. If it is satisfactory, they will receive a vision.

Then, the ritual can be repeated. Pay upto your level in gp. Certain events happen when you reach a total amount of gp devoted.

gp	Event
2	+1 HP
3	Your bandages heal +2
5	Restore a deity disfavor
7	Bestow a blessing on a willing player character: They can memorize and cast one 1st level spell from your class of your choice, but must follow the tenets of your religion.
11	Recive a quest. No more devotion until it is complete.
13	Increase an ability score by one
17	Restore a deity disfavor
19	Choose one spell. It has a 1-in-6 chance to be remembered after casting. If there are dice in the spell, increase them one size (d4 to d6 to d8) to a maximum of a d12.
23	Remove all your devotion, and destroy your ritual. When you begin anew, the prime number costs of devotion start from one prime higher (3,5,7; 5,7,11; etc).

3. EMBEZZLEMENT

Only Clerics and Princesses can engage in embezzlement.

1. VACANCY

You're able to find Lvl * 20 cp to embezzle.

In addition, taxes, unclaimed inheritance, and similar transactions from previous sessions can be embezzled.

2. LAUNDRY

Roll a d6 for each 100 cp.

- **1:** Lose the money, and risk getting caught.
- **2:** Lose the money, but don't take any risk.
- **3-6:** Safely sequester the money into your own account.

3. RISK

Check your **INT**.

- **Success** Safely sequester 150 cp into your account.
- **Failure:** Caught! Perform a downtime of service for each time you have ever been caught embezzling.

4. FORGING

Only Dwarves and certain Fighters can forge. Choose one option.

1. HONING

Costs 50 cp. A honed weapon deals an additional d4 damage. When rolling a 4 on that bonus, the honing fades.

2. REPAIR

Fragile weapons break over time. Restore it to its full damage die. Costs 10 cp (100 cp if magical) per each level of damage. Repair always takes exactly one downtime, and it cannot be used the session it is repaired.

3. CONSTRUCTION

You can make any weapon, chain mail, or plate mail. See **weapons** and **armor**. Get a note card to track your progress. Calculate the total points of the weapon being constructed, based on its damage, properties, and enchantments:

Properties	Point
Chainmail	10
Platemail	20
d4 or d6	1
d8	4
d10 or d12	7
slow, two-handed	1
blunt, charge, melee	3
splash, thrown	5
fired, fragile	7
+1 enchantment	12
+2 enchantment	36
+3 enchantment	108
Flaming enchantment	24
Warning enchantment for one type of creature	16

Each downtime costs 5 cp for normal weapons, and 500 cp for enchanted weapons. Progress 1d6 points each downtime.

Up to two characters can work on the same weapon at a time.

5. HIBERNATE

Only animalkin can rest this deeply.

1. HEALING

2-in-6 chance to cure a mundane disease or neutralize a mundane poison.

2. DREAMS

Gain one rumor from a dream. 1-in-10 chance to have to battle a monster in the dream dimension. Same rules as downtime questing.

HP: Lvl * d4, **AC:** 10 **AV:** 19, **Dam:** 2

Reward: 200 xp + a strange item.

6. MAGICAL RESEARCH

1. SPELL BOOKS

Only arcane magic-users can use spell books.

2. ADDING TO A SPELL BOOK

Arcane magic-users can only add to their own book, and only spells on their spell list.

All spells must be identified with Read Magic, and takes one downtime per spell level.

Adding from a spell scroll costs 100 cp per spell level, and destroys the scroll. To succeed, roll a d100 under **80 + INT**.

Adding from a spellbook that isn't yours costs 300 cp per spell level.

The success rate is a d100 under **50 + INT**.

You can also learn a spell from a mentor, if you have one. They must be of a class and level that could learn the spell.

The chance that your mentor knows the spell is the sum of:

- mentor level / 5
- spell level * 2

3. CREATING NEW SPELLS

The player describes in detail the spell they wish to create. The referee decides if the spell can be created.

The spell must be of a level the character can cast. Research takes two downtimes and 1000 cp per spell level.

4. CREATING MAGIC ITEMS

Only magic-users of 9th level or higher can create magic items.

The player describes in detail the item that they wish. The Dungeon Master decides whether this is possible and, if so, what materials are required.

Divine spell casters may only create items that they are able to use themselves. Arcane spell casters may create any item except those that may only be used by divine spell casters.

Creating magic items requires rare components such as expensive gems or ingredients from rare monsters.

If duplicating the effects of a spell, construction costs one downtime and 500 cp per level of the mimicked spell, multiplied by the number of uses.

The Dungeon Master must use discretion for other items. As a general rule, items should cost from 100 to 1000gp and from 4 to 52 downtimes to complete.
