Character Creation

Get a sheet of paper, or print out a character sheet, to record all of your cracter's details. Make sure to do so in pencil, as these details change over time. If your character sheet ever gets too messy, you can always copy the info to a fresh paper!

1. Note IRL Name and Date

Write your name, and todays date.

2. Ability Scores

Your character has six abilities:

1. Strength
2. Dexterity
3. Constitution
4. Intelligence
5. Wisdom
6. Charisma

Choose either one of these arrays, and assign them however you like to the six abilities.

- 13, 13, 11, 11, 8, 8
- 16, 13, 10, 8, 6, 5

1. Optional: Rolling ability scores.

If you wish, you can instead roll 3d6 seven times and use six of them to create a new array.

3. Choose a Class

There are many classes to choose from. Make sure you meet the requirements for that class. See Classes. If you are new to the game, we reccommend **fighter**, **thief**, **cleric**, or **wizard**.

Unless you choose a Demihuman class, you are a human.

Note the following:

1. Your HP (health points) is equal to the maximum value of your class's Health Die. (d4=4, d6=6, etc)
2. The types of armor you can use.
3. The types of weapon you can use.

4. If you have 13 or more in your prime requisite, note a 10% xp bonus, or 15% if you have 13 or more in both.
5. Your AV (attack value) is on the progression table. Its usually 19.
6. Your saving throws scores for physical and magic are on the progression table.
7. The xp threshold for level 2.
8. Class abilities and skills.

4. Items and money

You start with 3d6x10 cp in your bank account.

You have a base of ten item slots. One item per slot, heavy takes double, small items fit 5 per slot. Buy items LINK GOES HERE.

6. Alignment

Choose whether you are Lawful, Neutral, or Chaotic. This impacts spellcasting and roleplay. Note that some classes have restrictions on which alignment they can be.

Beneath the surface of everyday life, two primeval forces mingle. Their servants see a cosmic harmony permeating the plane, or see only probabilities.

1. Magic

Magic affects creatures differently depending on alignment. Divine spellcasters need to be especially aware of their alignment; lawful casters may upset their deity by casting reversed spells, and vice versa. See LINKKKK for more details.

2. Alignment Language

Creatures automatically recognize a certain set of gestures, signs, and code words, pertaining to their alignment. This allows creatures of common alignment a measure of communication.

Creatures of a different alignment are likely to recognize an alignment language being spoken, but will not understand its content.

3. Revealing Alignment

Players must reveal their alignment to the dungeon master, but are not required to reveal to each other.

4. Role Playing Alignment

If the character acts too far out of their alignment, the referee may require them to change their alignment and suffer a penalty.

5. Changing Alignment

When changing alignment from Lawful or Chaotic, characters loose 10% of their xp.

7. Complete!

If desired, you can name your character. Otherwise, you're done!

- **Single Monster:** Instantly banish or destroy a single enchanted or undead monster. It makes a magic save with a disadvantage to avoid banishment or destruction, likewise being turned on a success.

The caster first spends a turn drawing a ritual circle on the ground with chalk. Then after a second turn of chanting, a 6 HD fiend, typically a succubus, or a 6 HD celestial, typically an acheron, is conjured either inside, or outside of the circle. - **Movement:** Each turn, the fog moves to an adjacent zone, driven by the wind.
- **Sinking:** Because the fog is heavier than air, it sinks to the lowest level of the land, even pouring down den or sink hole openings.

- **Dismissing:** While control over the elemental is maintained, the caster may dismiss it at any time, sending it back to its plane of origin.
- **Disruption:** If the caster's concentration is disturbed, the command over the elemental ends. It is, henceforth, a free willed entity and will immediately try to kill the caster and any who get in its way.

56. Contact Higher Plane

The caster has can ask a powerful, otherworldly being for advice and knowledge on any subject.

Plane: The caster must choose which plane of existence to contact. Higher planes are home to more powerful and knowledgeable beings. The spell lasts one turn per level of the plane, and requires full concentration.

Questions: The caster may then ask a number of yes/no questions equal to the number of the plane contacted.

Answers: For each question asked, there is a chance of the contacted being not knowing the answer, or of answering untruthfully.

Restrictions: Contact may be cast at most once per month.

Insanity: Contact has a chance of causing insanity. Insane characters are incapable of action or communication. the recovery time is a number of weeks equal to the number of the plane. For every level of the caster above 10, this chance is reduced by 5%.

The destination may be at any distance, but must be known to the caster. The destination must be an open space at ground level. (It is not possible to intentionally teleport the subject into mid-air or into solid matter.)

>

There is a risk of accidentally arriving above or below ground level. The chance of a successful teleportation depends on the caster's knowledge of the destination (see right). Roll d% and consult the table

Know.	of	Dest.	Ground	Level	Too	High	Too	Low
Scant	01-50	51-75	76-00					
Medium	01-80	81-90	91-00					
Exact	01-95	96-99	0					

- Ground level: The subject appears at the desired destination.
- Too high: The subject appears 1d10×10' above the intended destination. Should this location already be occupied by solid matter, the subject is instantly killed. Otherwise, the subject falls from a height.

The wall functions the same as the wall of stone, but is made of an invisible air current. It lasts until fatigued twice.

6. 6th Level

63. Anti-Magic Shell

An anti-magic barrier is created around the caster. It's a 10' radius sphere. It moves with the caster. The caster must concentrate to maintain it. 66. Invisible Stalker

An invisible stalker is summoned to the caster's presence and magically bound to perform a mission of the caster's choosing.

- **Range:** The image must remain distant or closer to the caster.

68. Reincarnation

A dead character is returned to life in a new physical form that manifests in the presence of the caster. The character's new body is not necessarily the same as the original; it is determined by rolling on the Reincarnated Class table. The roll indicates either a character class or a monster:

The character is of experience level 1d6 lower than they were in life. There is a 2-in-6 chance they are the same class, a 1-in-6 chance they are a different human class, 2-in-6 they are a different demihuman class, and a 1-in-6 chance they are instead a monster of the same alignment and number of hit dice.

- Use a note card or additional sheet of paper to keep track hirelings. You can use one card per each, or a large sheet with several.
- Each character can be a boss to a finite number of hirelings determined by renown (as indicated by charisma).
- Hirelings must have fewer hit dice than their boss

- Henchmen have 10 slots.
- Henchmen have a d8 hit die, and calculate HP like players.
- Henchmen go near-death and dismember like players.
- When a boss gains xp, they can choose to direct upto 50% of that XP to their henchman.

- Instead of upkeep, henchmen are paid with a portion of their boss's treasure. That portion is equal to two divided by their loyalty.
- At 2nd level, they gain one ability. If their boss is a spellcaster, they can memorize one 1st level spell from their boss. Otherwise, they choose one **fighter skill**.

- At 4th level, they gain a second ability. If their boss is a spellcaster, they can memorize one 2nd level spell from their boss. Otherwise they choose one advanced fighter skill.

7. creating magic Items

Only magic-users of 9th level or higher can create magic items.

The player describes in detail the item that they wish. The Dungeon Master decides whether this is possible and, if so, what materials are required.

1. Restrictions

Divine spell casters May only create items that they are able to use themselves. Arcane spell casters may create any item except those that may only be used by divine spell casters.

2. Materials

Creating magic items requires rare components such as expensive gems or ingredients from rare monsters.

3. Cost and Time

If duplicating the effects of a spell, construction costs one week and 5g, per level of the mimicked spell, multiplied by the number of uses.

The Dungeon Master must use discretion for other items. As a general rule, items should cost from 100 to 1000gp and from 4 to 52 weeks to complete.

Spellcasting

The oldest powers of the world wrote secret patterns into the world. Adventurers who learn these patterns can utilize a mystical pattern of trance, produced by memorized gestures and words. Though, this power is limited by the caster's memory. This is Vancian magic, and different than other games.

There are two types of magic-users.

Arcane Magic: is accessed through esoteric study and a understanding.

Divine Magic: is granted by a higher power, the favor of which must be maintained.

1. Memory

Magic-using classes have a magic progression table which shows a number for each of the five levels of spells. This is how many spells can be memorized at a time. They can memorize spells at the start of a session, and after resting in town. They can also memorize some spells while camping. LINK

A single spell can be memorized multiple times, creating multiple instances / uses. A low level spell can be memorized in place of a higher one.

Casting a spell causes the spell to be forgotten. Being interrupted while casting will also cause the spell to be forgotten.

1. Arcane Memorization

When arcane magic-users memorize, they choose spells from their spell books. See below. They must also choose whether to memorize the normal or reversed version of a spell.

2. Divine Memorization

Divine magic-users pray to receive memory of the spell. They must maintain favor with their deity. See below.

They may choose whether to reverse it at the time of casting, by performing the spell backwards.

2. Casting Limitations

Spells are cast by reciting a special words and gestures. There are several limitations on these actions:

- **Freedom:** A magic-user must be able to move and speak freely.
- **Line of Sight:** The target of a spell must be visible to the caster.
- **Time:** Spell-casting takes one round. If interrupted (i.e. attacked), the spell is wasted.
- **Material:** If the spell refers to a material component, e.g. chalk, the caster must have it on hand in order to cast the spell.
- **Range:** Spell effects are limited to close and touch, unless specified otherwise.
- **Movement:** The spell caster must be standing still during the casting.
- **Quiet:** Casting creates quiet noise. Casting is impossible in areas of magical silence.
- **Unwilling:** When the target of any spell is unwilling, they may attempt a magic save. If the spell targets a touched creature, instead the caster must hit them. Some spells specify differently.
- **No Cumulative effects:** Multiple spells cannot be used to increase the same ability.
- **Range:** Spell effects are limited to close and touch, unless specified otherwise.
- **Fatigue:** A magic user can not cast spells while fatigued. Some spells last until fatigued. (resting can extend these spells only before casting).
- **Resistance:** Some creatures have a % chance, in addition to their save, of not being affected by spells and other magical effects.

3. Spell Lists

Each spell-casting class has a limited number of spells it can learn and use. If a spell isn't on your spell list, you can't learn that spell, nor use spell scrolls of that spell.

The same spell may be different levels for different casting classes.

4. Concentration

Some spells last for as long as you can concentrate. Various actions will break concentration:

- Attacking or being hit
- Taking damage
- Using magic items
- Failing a save
- Sleeping
- Being surprised

Full concentration also imposes bad and requires closing your eyes.

1. Breaking Concentration

If a spell requires concentration, breaking concentration will end the spell. This deals damage equal to the spells level to the caster, or thrice that if full concentration.

5. Deity Disfavor

Divine magic-users must maintain favor with their god. When a divine magic-user breaks their tenants, or casts a spell against their alignment, they may be sent to court.

1. Alignment

A divine spell-caster's alignment should be the same as their deity.

Chaos favors reversed spells, and Law favors unreversed. Neutral will choose their favor for that session when memorizing. Casting the wrong orientation of spell will risk disfavor if done without cause.

Spells without a reversed version are not subject to this.

2. Court

After potentially incurring disfavor (i.e. after combat has finished), a divine magic-user will be psychically transported to court. They have two options:

Plead Guilty: 1-in-6 chance of not being disfavored.

Plead not-guilty: Roll 3d6. If there's triples, or the total is less than or equal to your level: not disfavored.

3. Penalties

Normally, divine magic-users receive any spell they ask for from their spell list. With disfavor, for each spell memorized roll a d6. There is a chance they'll receive a random spell, or no spell.

Disfavors	Normal	Random	None
1	1-4	5-6	-
2	1	2-5	6
3	-	1-4	5-6
≥4	-	-	1-6

If disfavored while outside, there is a 1-in-10 chance to be struck by lightning.

4. Forgiveness

Clerics can forgive disfavor through downtime, or through performing a quest for a temple of their alignment or diety.

6. Spell Books

Arcane spellcasters begin the game with a spell book in addition to their other items.

Spell books take up 1 item slot, and can contain up to five levels of spell. That is, 1 1 1 1 1, 2 2 1, 3 2, 3 1 1, 4 1, or 5. To have more spells, additional spell books must be purchased.

You must have access to your spell book while memorizing.

Each level up, arcane spellcasters may add another spell from their spell list. To add more spells, or duplicate spell books, see magical research downtime.

7. Charms

Some spells are described as charmed. These spells have discrete gestures and signs, that can be performed in conversation without recognition from an untrained eye.

Some creatures, such as fey, are immune to charms.

8. Resurrection

Being brought back from the dead is an ordeal. It's impossible if the body has been cremated, or if the soul is imprisoned. After brought

back, the constitution score is reduced by 1d4, and they are extremely frail for two weeks, having 1 hit point, and being unable to cast spells.

- Overland Travel
- Dungeon Exploration
- Combat
- Mapping
- Cleanup
- Checks and Saves
- Roles
- Minigames

Dungeon Exploration

This is the main game. It's dungeon time, fuck yeahh.

1. Sequence of Play per Turn

A turn represents roughly 10 minutes of game time, or one activity in the dungeon.

1. **Activity:** The party decides what to do, e.g. moving, searching, listening, investigating, talking, fighting.
2. **Description:** The dungeon master describes what happens, what is seen, if monsters are encountered, etc.
3. **Hazards:** The dungeon master checks hazards.

1. Hazards

A hazard check encompasses a variety of time based treats to adventurers. The dungeon master rolls a d6 to determine the hazard.

- **1.Nothing:** The adventure continues.
- **2.Burn:** Torches burn out, and lanterns need fresh oil.
- **3.Fatigue:** Loose well-rested (if you are), become fatigued (if not already), or takes 1d4 damage.
- **4.Shift:** Traps reset, doors swing close, and other aspects of the dungeon are triggered.
- **5-6.Wandering Monsters:** The dungeon master checks for wandering monsters. An additional check is made whenever the players make a loud sound.

2. Movement

1. Marching Order

While moving through narrow doors and halls, movement is restricted. The marching order is decided by the players. In general, only the front and the back are significant.

2. Travel Distance

If nothing else ends the turn, moving through three zones (i.e. three rooms/hallways) is a turn. By moving quickly through a familiar area, you can move up to nine zones instead.

3. Listening and Opening Doors

Listening at a door or corridor can reveal what lies beyond. Roll a d6, and add the bonus from your wisdom score (Some classes, like thieves, have additional bonuses). On a result of six or more, the dungeon master will reveal sounds you are able to hear.

When opening a door, check your strength. If you fail, the door makes a loud sound. Otherwise, the door opens silently. Only a player at the front of the marching order can open doors; opening a door implies moving to the front. If there is not a door, a player can instead check their dexterity to approach silently.

Physically destroying a door takes a full turn, requires appropriate tools, and makes loud noise.

3. Encounters

1. Surprise

Players can surprise monsters when they open a door quietly, or charge into a room. Players are unable to surprise monsters when carrying a light in a dark area, and after making a loud noise. Monsters can surprise players when hidden in a room, or after stalking the players for one turn.

Surprised creatures take no actions the first round of combat, make a moral check, and are automatically hit by attacks.

2. Reaction

The dungeon master might roll to determine monster reaction, especially on random encounters. The dungeon master might include a reaction modifier from either the players in the front or a player initiating a confrontation.

2d6	Result
2 or less	Attacks
3-5	Hostile, may attack
6-8	Uncertain, confused
9-11	Indifferent, may negotiate
12 or more	Eager, friendly

3. Wandering Monster

A high rate of encounters is 1-in-6, a low rate is 1-in-12. Heavily patrolled areas may have an even higher rate. Monsters appear 1d4 zones away.

4. Decision to Evade

When two groups encounter one another, one or both may decide to evade the other, or one group may decide to pursue the evading group.

- If both choose to evade, nothing happens.
- If one chooses to evade, and is not pursued, nothing happens.
- If one chooses to evade, and is pursued, the chance of successfully evading is 3-in-6. If they fail, begin combat
- If a group is surprised, they are unable to evade nor pursue.

5. Mapping

Once the encounter (if any) is settled, players are able to observe the room for long enough to add to their map.

4. Misc

1. Searching

Very little treasure will be obvious at first glance. Searching:

- Reveals all non-obvious features, such as traps.
- Will always reveal everything it can.
- Takes a minimum of three people per zone.
- Is a turn.

2. Rest

Ignore the fatigue hazard while resting. A wandering monster will disrupt a rest.

Taking a turn to rest removes fatigue. If not fatigued, instead

become well-rested; end spells that last until fatigued.

5. Light

There are three levels of light:

- **Dark:** The darkness is pitch black, and prevents sight. Imposes blindness.
- **Dim:** Allows some detail to be seen.
- **Bright:** Allows full vision, including details and reading. Disables infravision.

A light source casts bright light within touch, and dim within close.

1. Infravision

A special type of vision had by many monsters: seeing heat energy that radiates of living things. When a creature with infravision stands in bright, they are blinded for one round, and their infravision is disabled until they spend a full turn in the dark.

It is not possible to read in the dim or dark with infravision.

2. Blindness

Creatures who are unable to perceive their surroundings:

- Make all attacks, checks, and saves with disadvantage
- are always hit by attacks

6. Zones

The dungeon environment is split into zones. As a rule of thumb, each room and hallway is a zone. Large rooms or hallways may be multipole zones.

1. Guidelines

- **Architecture:** Architectural features, such as doorways, should divide zones.
- **40':** Rooms bigger than 40', and hallways longer than 40', should be multiple zones.
- **Even:** Large rooms and hallways should have their zones divided evenly.

- **Whole Number:** Large rooms and hallways should always have a whole number of zones.

2. Ranges

Ranges and relative location are divided into four ranges:

- **Touch:** Striking distance.
- **Close:** Throwing distance. Speaking distance. With in the same or adjacent zone.
- **Distant:** Shouting distance. Upto 2 zones away. Farthest distance to make out details (in bright light).
- **Sight:** Anything that can be seen. Up to 3 miles in ideal conditions.

7. Lost in the Dungeon

Should the session end with the adventures unsure of a way out, the dungon master can employ the following table. Each player rolls a d12, adds their level, and subtracts the level of the dungeon they are on.

d12	Result
<=2	You are consumed by the horrors below. You die and your body unrecoverable.
3	You are slain and rise from the dead as a wight. It carries your equipment, and slaying it will be required to ressurect you. The dungeon master adds it to the wandering monsters.
4-5	You die somewhere in the dungeon.
6	You are possessed! The dungeon master adds you to the wandering monsters. When encountered, you will be hostile, but can be captured and exorsized.
7	You are lost and starving in the dungeon. Roll again at the start of next session.
8	You are captured! You party members can pay randson of 50gp x your level, or leave you hostage in the dungeon.
9-10	You suffer a terrible injury. Roll dismemberment.
11-12	You have survived!
>=13	You have survived, and the gods look favorably on you! If lawful: learn the location of a treasure. If chaotic: learn something about an enemy. If neutral: gain 10 xp.

Combat

1. Initiative

At the start of each round, the dungeon master and the player each roll a d6. If the players roll higher, or equal, they go first. Otherwise, the monsters go first.

Each round, each combatant can take one action. Then they must wait for the next round to act again.

2. Actions

1. **Move and Attack:** In any order, make an attack with a weapon, and move within or to an adjacent zone.
2. **Run:** Move two zones.
3. **Focus:** Until the end of the next round, you have advantage on dodges, saves, attacks, and checks.
4. **Magic:** Cast a spell or use a magic item. See Magic. You must not have taken damage this round in order to cast a spell.
5. **Ready:** Prepare to attack, move, or stunt if a stated occurrence.
6. **Stunts:** Other maneuvers are stunts. See below.

3. Stunts

the idea of stunts encompasses grappling, tripping, and any other kind of creative option. Stunts may not cause damage directly, but can do about anything else.

How stunts are resolved is up to the dungeon master. These are provided as examples.

- **Shove:** a hit has a 3-in-6 chance of moving an enemy.
- **Flinch:** a hit allows creatures to move through the target's space.
- **Sunder:** a hit deals 1d4-1 damage to the weapon or armor.
- **Disarm:** a hit grants a dexterity check to disarm an enemy.

- **Intimidation:** with a creative threat, and successful charisma check, force enemies to make a moral check.
- **Wrestle:** Become prone. With a successful strength check, an enemy is also prone.

4. Attacking

1. Making an Attack

To attack, subtract a d20 from your AV. If it is less than or equal to the AC, you hit. If you're making a weapon attack, the damage will depend on that weapon's damage die. (low roll good).

Melee attacks have a range of touch. ranged attacks have a range distant (i.e. in adjacent zones or closer).

2. Dodging an Attack

To dodge an attack, roll a d20 and add your AC. If it is less than or equal to the AV, the attack is a miss. (low roll good).

3. Statistics

The Armor Class (AC) is how likely a target is to be hit. The base armor class of an unarmored character is 9.

The Attack Value (AV), also called THAC0, is how likely an attack is to miss.

Lower AC and AV are better.

The Dungeon Master might either announce the result of the attack, or tell you the AC/AV so you can announce it yourself.

5. Damage

Damage represents injury, exhaustion, and wear.

1. Slain

When a creature takes damage equal to or greater than its HP, it is slain. Slain hirelings and ordinary monsters instantly die. Slain PCs and powerful monsters are near death. See below.

If a creature is slain with a blunt weapon, they can be left non-lethally incapacitated until a

shift. Creatures slain with non-blunt weapons bleed out within minutes.

If slain by fire, or explosion, items are destroyed, and PCs and powerful monsters instantly die. Magic items have a chance of miraculously surviving.

2. Item Damage

Items with four or more damage break completely. Magic items are immune to damage.

Each point of damage incurs a penalty:

- **Weapons:** -1 to damage rolls.
- **Armor:** +1 to AC.
- **Other:** -1 to any rolls made with it.

Dwarves are able to repair items as downtime.

6. Healing

Healing removes damage.

1. Magical Healing

Magic potions or spells can provide instantaneous healing.

When magically healing a near death character, they dismember with advantage.

2. Bandage

Bandages can be used to gain some healing. Make an intelligence check. If you succeed, heal the target 1d6, plus a bonus from your wisdom. See ability scores. You may bandage yourself.

Bandaging consumes a bandage. Once you are bandaged, you can not be bandaged again until you are damaged.

7. Near Death

Characters that are near death:

- Can not move, take any actions, use spells, or use magic items.
- Die during a shift.
- Are automatically hit by all attacks.
- If they would take damage, they instead dismemberment.

- If they would be healed, they instead dismemberment. Then, if they survive, they stop being near death and heal 1. If healed by magic, they dismember with advantage.

1. Dismemberment

Roll a d12, and add constitution score. Reference the table.

Result	Dismemberment
<= 8	Dead!
9	Mostly dead: Until dully healed, you can only be healed magically.
10-14	Broken rib: -1d4 constitution
15	Broken leg: +2 AC
16	Lost arm: Can't use two-handed weapons nor shields. Loosing a third arm is fatal.
17	Lost eye: If you loose both eyes, you are blind. Loosing a third eye is fetal.
18	Concussion: -1d4 wisdom and intelligence
19	Torn muscle: -1d4 dexterity
20	Bone fracture: -1d4 strength
>=21	Miraculously Unharmed

8. Moral

Monsters, and minions might have the moral broken. They check their moral when:

- first death on their side
- leader killed
- group reduced by half.
- Last remaining is bloodied.

The dungeon master rolls 2d6. The check fails if the result is greater than their moral / loyalty score. They surrender or flee.

9. Conditions

2. Prone

Attacks against prone creatures have advantage. A creature is prone until it uses it's action to stand up.

3. Restrained

A restrained creature is incapacitated. If restrained by mundane forces, a creature can attempt to break out of it.

4. Turned

A turned creature is overcome with fear, cowering when unable to flee.

5. Incapacitated

Attacks against an incapacitated creature hit automatically. An incapacitated creature is unable to move or take other actions.

10. Exhaustion

At the end of the 9th round, and each round after, all creatures still involved in the combat take 1 damage.

11. Miscellaneous

6. Difficult Terrain

The first attempt to move out of difficult terrain fails. i.e. it

takes two moves to pass through.

7. Flanking

In melee, if one side surrounds the other, the surrounded side has a +4 penalty to AC.

8. Friendly Fire

When a ranged attack misses, players make a dexterity check to void hitting an ally. Monsters and minions have a 3-in-6 chance.

9. Mapping

During combat, it's possible to reference a map, but adding to a map is impossible.

Mapping

Dungeons are complex environments where it is easy to get lost. Keeping a map is essential. To keep the dungeon mysterious and labyrinthine, it's essential to maintain the fog of war by having the dungeon master not provide an exact map.

The Dungeon Master should avoid looking at the players map, and avoid perfecting the players map.

Its recommended that one player take on the role of Mapper. See Roles.

1. White Board Method

The dungeon master has a clip board, a page protector, 1\2 or 1\4 graph paper, and a dry erase marker. They can draw out the current and near rooms. Its upto the players to copy and connect the rooms. As the players adventure deeper into the dungeon, the dungeon master erases and draws new areas.

2. Flow Chart Method

Rather than track the exact dimensions of every room, the mapper might opt to keep a general shape of the dungeon with a loose flow chart, labeling rooms and their connections.

3. Calls

While not in an encounter, the mapper asks the dungeon master for a call. Each call should have an unambiguous meaning. The mapper and Dungeon Master should work together to establish calls that work for them.

GFC's video is a perfect explanation of dungeon mapping. This page is a written guide based on their advice.

Additionally, you may wish to modify the system to better suit your needs. Any non-ambiguous agreed upon system will work.

1. Restrictions

The Dungeon Master will only provide calls when the players ask, and only after they enter a room and are able to spend time observing it.

Clean Up

1. Divide treasure

The quarter master totals the value of the treasure, and splits it between the players.

Money is typically split evenly, while magic items can be diced or bargained for.

2. Award Experience

The score keeper confers with the dungeon master to confirm each of the scores and their value. Then totals it and divides it by the surviving players.

See [Experience](#) for more details.

3. Experience

This chapter covers experience points (XP) and how it is awarded. XP is a measure of a PC's power and wealth, and creates progression.

At the start of the session, the Score Keeper will begin a score card: a simple piece of paper to write down scores as they happen.

At the end of the session, the Score Keeper will confer with the dungeon master to confirm each score, and establish the total amount of XP. XP is divided evenly between all players. Players who had a character die can put the XP to their next character. The Score Keeper will announce the individual amount gained.

1. Optional Rule: Prime Requisite

Each class has one or two prime requisites, which grants bonus XP for having a high ability score.

Characters with at least a 13 in one prime requisite gain 5% extra XP.

Characters with at least a 13 in both gain 15% extra XP.

Characters with at least a 16 in one prime requisite gain 15% extra XP.

2. Treasure

Recovering treasure from a dungeon scores 1 XP per 1 cp value of the

treasure.

Recovering a magic item scores 1000 XP.

3. Optional: Defeated Monster

Defeating monsters scores XP based on their HD, plus a bonus for each special ability. E.g. a 2 HD monster with an ability is worth 25 XP.

HD	Base	Bonus
<1	5	1
1	10	3
2	20	5
3	35	15
4	75	50
5, 6,	300	250
7, 8,	650	550
≥9	1000	700

4. Mapping

Exactly mapping a complete dungeon level scores XP equal to 1000 times the depth of the level.

5. Session Report

Writing a session report scores 100 * Lv XP to the writer at the start of the next session.

4. Leveling Up

When a character gains enough XP to reach the next experience level:

- Looks at your class progression tables and notes any improvements in saves, AV, spells, etc.
- Roll a number of HD equal to your level. If it is greater than your current HP, that is your new HP. Otherwise, increase your HP by one.
- Increase one ability score by 1, to a maximum of 18. At 9th and 14th level, you may instead increase one ability with an 18 to a 20.
- Gain an additional downtime.

1. One Session Maximum

Characters cannot advance more than one level in one session. Leave the character 1 XP below the threshold for the next level. The remaining XP can be distributed among the other characters, as the player

wishes. If all characters are 1 XP below the threshold, extra XP is wasted.

5. Abandonment

A character of 2nd level or higher can be abandoned. They permanently leave the game. Abandoned characters can leave 50% of their wealth and 80% of their XP to a new character.

6. Funerals

1. Burial

Simple burial prevents the body from being reanimated. Temples will bury and bless the dead for free. If a cleric uses one turn to preform a blessing, the soul will pass peacefully.

When a character is buried in town, a funeral can be given. For each cp spent on the funeral, that player gains 1 XP, to a maximum of 100 times the level of the character being burried. In addition, all players that attend the funeral gain XP equal to 10% of the total cp spent.

Cremation prevents reanimation and is impossible to undo.

2. Inheritance

Money and items stored in town will be subject to a 15% estate tax to local government or temple, and

then inherited by the next of kin or listed heir. Further embezzlement can be done through downtime.

3. Resurrection

Returning from death is an ordeal. Until the subject gets two weeks of bed rest, they have 1 HP, move at half the normal rate, can not carry heavy items, cannot attack, cast spells, or use class skills.

Each time a character is resurrected, their constitution is reduced by 1.

7. Evaluate Loyalty

Hirelings, if any, adjust their loyalty score. For each hireling, roll a d6.

1. No Change
2. No Change
3. If they succeeded a loyalty check this session, they gain one point. 1-in-6 chance to gain one renown, to a max of 6.
4. If they failed a loyalty check this session, they loose one point.
5. If an animal or monster got to eat its favorite prey, they gain one point.
6. If a hireling died that session, non-monster hirelings loose one point. 1-in-6 chance to loose one renown.

Checks and Saves

1. Abilities

There are six abilities: strength, dexterity, constitution, intelligence, wisdom, and charisma. They're rated from 3, the worst, to 18, the best.

1. Checking

You succeed if $d20 \leq$ the ability score. (low roll good)

2. Saves

All characters and monsters can make saves to avoid the full effects of certain traps, spells, and attacks. There are two kinds, physical, and magical. Your class's progression table determines your save values.

You succeed if $d20 \leq$ save value. (low roll good)

Success against an effect that causes damage means that the damage is halved. Otherwise, the effect has been entirely avoided or negated.

3. Advantage and Disadvantage

1. Advantage

When making a roll with advantage, roll an additional time for each advantage. Take the best roll.

2. Disadvantage

When making a roll with disadvantage, roll twice and take the worse.

3. Combination.

One disadvantage and one advantage cancel out.

4. Loyalty Check

Roll 2d6. The check succeeds if the result is equal to or less than the loyalty. (low roll good)

4. Optional: Heroism

Push yourself. Reduce your constitution score by one. Choose one:

- Gain advantage on one check.
- Take an action despite being near death with disadvantage.

Overland Travel

Within one region of the world, travel can be handwaved, perhaps having a chance of random encounter. When traveling between regions, the dungeon master will prepare a map with events, and paths, as well as tables for survival events, monster encounters, and treasure.

1. Survival Points

The group begins with 7 travel points. They can never have more travel points than they start with. If they lose all travel points, everyone dismembers, and returns to the beginning.

Travel points can be lost by failing survival events. They can be restored at rest sites.

2. Events

There are four general types of events, though the dungeon master may further delineate these

- Rest site
- Survival event
- Monster encounter
- Location or mini dungeon

At the end of each event, the party must consume one ration, or lose a survival point.

All spells that end on a fatigue, burn, or shift also end at the end of an event.

3. Time of day

There are four times of day: dawn, noon, dusk, and night. Events may have different effects depending on the time of day.

4. Rest Site

At a rest site, the party chooses either to heal 1d6 and regain 1 survival point, or to roll on the treasure table. Below is a tiny example treasure table:

1. Sword in the stone: a +1 sword is stuck in a stone. Removing it requires three consecutive successful strength checks, and one successful charisma check. Each character can only attempt once.
2. Spider tree: a skeleton lies in a pool of water holding a shield of resistance 3. Above it lurks a 6HD adventure-eating spider. If night time, the ghost of the dead adventurer will also protect the shield.
3. Blessed clearing: divine spellcasters can pray in this clearing. It has a 6-in-6 chance to restore a 1st level spell, 3-in-6 to restore a 2nd level spell, and a 1-in-6 chance to restore a 3rd level spell.
4. Mysterious stranger: a traveler approaches the party in search of healing from a potion of healing, cure wounds, or similar. If granted they will give a gift, depending on the time of day: dawn: a pearled silver pendent with the emblem of house Loimur worth 1d6 * 100 cp. noon: potion of d6 (1: bless 2: remove fear 3: fire resistance 4: cold resistance 5: poison 6: invisibility) dusk: random wizard spell scroll of 1st or 2nd level. night: random cursed magic ring. There is a 2-in-6 chance the stranger knows what item he has.

5. Survival Event

These are short challenges representing survival challenges. Below is a tiny example survival event table:

1. Lost: lose one survival point. succeed a wisdom check or lose a second.
2. Shortcut: if you choose to take the shortcut, 3-in-6 chance to gain and 3-in-6 chance to lose a survival point.
3. hungry wolves: feed them three rations or lose one survival point.

4. Food poisoning: everyone makes constitution checks. If 50% or more fail, loose 1 survival point and a ration.

Minigames

1. Battles

Each battle takes a full daylet. Each side has an objective:

- Capture a location
- Repell or slaughter the opposing side.
- Another, as determined by the dungeon master.

Creatures form units of exactly 10 members. The total number of HD in the unit.

Initiative is handled the same as in combat. Each round, each unit can only move, and then attack.

1. Attacks

Units can not be dodged, nor do they make attack rolls. Instead, approximates the number of hits, using the table below, or the equation $10 - ((AV - AC) / 2)$ rounded down.

AC - AV	Hits
0	10
1-2	9
3-4	8
5-6	7
7-8	6
9-10	5
11-12	4
13-14	3
15-16	2
>=17	1

Units get +1 hit for each magic weapon being used, and each magic item the leader of the unit is using. They get half as many if they are using d4 weapons, or twice as many if using d10 or d12 weapons (slow still applies).

Each hit removes one HD from their target.

2. Morale

The first time a unit takes damage, they make a moral check.

When the unit has had half of its HD removed, they must check moral. If they fail, in addition to the usual consequences, half of the members (at random) are slain, and the leader

must succeed a physical save or be slain.

3. Regrouping

Creatures who flee battle can are able to regroup the next daylet, and then fight again the daylet after that.

2. Challenge

1. Objective

At the start of a challenge, the dungeon master will announce the number of successes needed to complete the challenge. as well as the number of failures to fail the challenge.

2. Procedure

1. Players make action to confront the challenge, and how they will support each other.
2. Dungeon master will say which ability to use, and if it is risky.
3. The player makes the check, with advantage for each supporter.

3. Risky

Risky checks start with two disadvantages, and results in either two failures or two successes.

3. Negotiation

1. When to Negotiate

Negotiation does not change an NPC's character. Instead, players convince an NPC that a certain course of action, is actually in character.

- Plausible request. Players need to write this down.
- NPC has reason not to immediately support the players.
- NPC wants to negotiate.

2. Statistics

The NPC has four stats: interest, patience, motivation, and pitfall.

Interest ranges from 0 to 5. If interest reaches 5, the NPC makes an offer. If interest reaches 0, the NPC ends the negotiation without an offer.

Patience ranges from 0 to 5, and can only be reduced. When patience

reaches 0, the NPC makes a final offer.

The dungeon master uses this table to determine the starting stats.

Attitude	Interest	Patience
Hostile	1	2
Neutral	2	3
Friendly	3	4

When an argument appeals to a motivation without mentioning a pitfall, the result gets better. When it appeals to a pitfall, it gets worse.

Each NPC will have about three motivations and about two pitfalls.

1. Benevolence
2. Discovery
3. Freedom
4. Greed
5. Higher Authority
6. Justice
7. Legacy
8. Peace
9. Power
10. Protection
11. Revelry
12. Vengeance

3. Discovering Motivation (and Pitfalls)

A player can attempt a wisdom or intelligence check to check a particular motivation. If they succeed, the dungeon master will confirm whether it is a motivation, pitfall, or neither. However, if they fail, reduce patience by one. Once the players make this check, they can not do so again until they make an argument

An NPC with interest 3 or more may hint at their motivations if asked.

Outside of negotiation can interrogate close friends, or

otherwise preform recognisance.

4. Arguments

Players must make a full argument the NPC; that is, what the NPC should do, and why.

The dungeon master will determine if this appealed to any motivations or pitfalls.

If it appeals to a pitfall, the NPC loses one patience AND one interest.

Otherwise, one player will make a wisdom or charisma check. Compare the result on the table.

-	Motivation	Normal
Success	+1 interest.	+1 interest, -1 patience.
Failure	+1 interest, -1 patience.	-1 patience

If the argument contains a lie, and it fails to increase interest, the NPC catches it and is offended, losing an additional patience.

5. Offers

After making an argument the NPC makes an offer based on their interest.

Interest	Offer
0	No, and...
1	No.
2	No, but...
3	Yes, but...
4	Yes.
5	Yes, and...

Keep Going?

If the NPC has remaining patience, and their interest is between 1 and 4, the players can choose to continue the negotiation, or accept the offer as is.

Player Roles

Using roles makes play smoother and easier for the dungeon master.

In addition to potentially being a score for the party, taking on a role during town scores 50 XP.

Its possible to have multiple of most roles. For example, there can be a caller for exploration and a caller for combat, or two mappers that check each other's work.

1. Mapper

Keep track of the layout of the dungeon. If you'd like, ask the Dungeon Master for exact map calls. See mapping.

2. Caller

Get consensus on what the party would like to do, and communicate to

the Dungeon Master.

3. Chair

Make sure that all the roles are filled.

4. Score Keeper

Keep track of scores, such as looted treasure, and defeated monsters. See experience.

5. Scribe

Keep track of the different monsters and traps, their behaviors, mechanics, and even their combat statistics (depending on the Dungeon Master's approach to metagaming).

6. Quarter Master

Keep track of torches, bandages, and other equipment. Keep track of loot as it collected.

Appendix A - Additional Notes

1. Modification

The book is meant to act as a standard reference for how the Dungeon Master makes rulings. While the Dungeon Master's call is ultimately final, its recommended to stick to the book, and later change unsatisfactory rules. Yabec is open source, and available on Github.

If players don't like the rules, they should begin a conversation about how they would like the rule, and the kind of game they are interested in playing. When an agreement is made, it should be reflected in the book. If they have other games they are interested in playing, they should also bring those to the conversation. /gen

The book also acts as a suggest stock of rulings. If the Dungeon Master should be able to appeal to the book, and get a simple but opinionated rule. The new rule should not disrupt the flow of play, but rather maintain it. If the rule turns unfun, it should be ammended via the above process.

2. Metagaming Comment

I have a lax approach to metagaming. Any info gained during the session is valid, including;

- Info from dead characters.
- Deduced AC and Hit Dice.

What would be metagaming would be searching the internet for answers, or reading the adventure source books.

This comment is meant to give the superflous mechanical permission to do this.

3. Appendix B - The West Marches

Life in the walled city is safe. Beyond its barrier is the WEST MARCHES, where monsters roam and acient treasure lay.

West marches is a style of play. There is an open fantasy world, maintained by one or more dungeon masters. Players organize freely into adventuring parties, exploring where they may. At least three players are needed to run, but ideally four to six. Dungeon mastes may be prepared to run for as many as a dozen players. Players should be enterprising, conspiring to meet and secure valuable treasure,sharing bits of lore and secrets with eachother.

Change Log

What's changed since the last version of Yabec? The current print version is 3.2! Get involved with Yabec development on [Github](#)!

- Overhauled travel again! the point crawl rules are still available [here](#)
- New pdf rendering engine uses [Selenium](#) which fixes many rendering issues. A single volume manual is now also available.
- Cure poison and cure disease spells have been merged
- Animalkin's claws become magical at 5th level.
- mapping section now favors the white board method as it is the most intuitive. The visual aids for the call method have been removed.

1. All changes in from version 2

- Minions overhauled again! See below.
- Saves are roll under, and there are now only two. Update your character sheet.
- Spell descriptions continue to be updated
- Travel rules overhauled to allow for camping
- Tweaks to: weapon stats, combat rules.
- Reorganized the pages and formatting, and added additional links and navbars to the website. It should be easier to navigate.

Rulings I'm going back on:

- Resting while not fatigued prevents the next fatigue. This is a reasonable action with analogues in clock hazard games.

- Resting while not fatigued can extend spells, but only when done before casting. This rewards player planning, and spells which would become op can end on a shift instead of fatigue. For the exact rule see [both the hazard and resting sections](#)

1. Whats changed since 3-0

- Renamed items page to shop
- Tweaks to travel:
 - Camping doesn't consume rations
 - Added water path
- Changes to classes:
 - clerification on fighter and animal kin
 - Added Animal kin yapper
 - Added telepathy, and realign to mystic, as well as implementing spell descriptions and other tweaks
 - High level dwaves can speak to stones
 - Reworked kobold. Now their gimmick is gathering kobold.
- Tweaks to minions:
 - Minion evaluation can raise renown to 6, previously 5.
 - Torch bearer restock and 2 slots. Added journeyman torch carrier
- Clarification on gambling
- Fixed various typos and formatting.

2. Minions

Minions are replaced by hirelings. There will be less paperwork, and better balance.

- The maximum number of hirelings is now called "renown". Its still determined by your charisma score like before, and the value hasn't changed.
- Animals still count against your renown.
- All human/demihuman hirelings go out adventuring on their own. (they return any equipment).

- If you like, pick one human minion to hold on to. They become a "henchmen". This a special type of retainer that acts as your sidekick. Reduce their XP by half.
- Many basic types of hireling can be found on the items list. They are specialized for different tasks. The lackey can carry many items, the man-at-arms comes ready to fight, and the supplier will restock common adventuring equipment.
- See hirelings for more info.
